**DIRECT CLUTCH RETURN SPRING KIT**

H I G H P E R F O R M A N C E T R A N S M I S S I O N P A R T S

**FEATURES & BENEFITS:**

- **Reliable replacement of OEM springs**
- **Engineered for improved spring life**
- **Manufactured for better spring engagement**

**Part No.**

**28320**

*24 Springs*

**PART SUMMARY**

The Sonnax Powerglide direct clutch return spring kit offers a reliable replacement of the OEM or aftermarket direct clutch return springs, which is a standard procedure for off-season Powerglide overhauls. Packaged in kits of 24 springs, these springs are made from high tensile spring wire to slow fatigue. In addition, each spring is cadmium-plated and baked to resist embrittlement. All spring ends are close-wound to prevent arch deflection and then match ground to a uniform length to ensure equal load distribution among all springs in the clutch assembly.

Sonnax has engineered **28320** to provide positive disengagement of the direct clutch in low gear and to yield minimal resistance during upshift.
