AL-N-2 is:

Item Numbers 11 & 12 for Allison 1000/2000/2400 Series on page 40.

Sonnax now offers **AL-N-2**, a high-quality, fully enclosed needle bearing. **AL-N-2** is a direct replacement for the turbine side bearing on late-model 2006-up units. The **AL-N-2** bearing, used in combination with the **AL-WS-1** or **AL-WS-3** spacer and **AL-HT-1HS** or OEM turbine hub, can be retrofitted into units manufactured earlier than 2006. Sonnax also offers **AL-HT-1HSM** and **AL-HT-2HS**, modified version turbine hubs that eliminate the need to modify the **AL-HT-1HS** or the OEM turbine hub when converting early-model turbine side bearings. Modifications to the stator are still required.
